Generac NP52G generator problem:  
Rick: 7-7-08 : The generator has been running great till I tried to start it the other day. It just clicks and doesn't turn over. Like a starter that is locked up or something. Battery is full of charge so it's not that. The big red wire that goes to a solenoid gets pretty hot when I try to start it.

Generac NP-52G cranks but will not start. I have a Generac NP-52G generator in my RV and it is no longer starting. It cranks but does not start. This is the older model Generac without a control board, only relays. To give you a little history, I have been using it every weekend or so for the past few months and it has been running fine.

## **Generac NP-52G cranks but will not start. I have a Generac ...**

The Generac I have is a constant speed machine, about 2100 rpm for the engine and 3600 rpm for the alternator. This is a good arrangement since alternator speed has little effect on wear. So my Generac should have a comparable life

# Download Free Generac Np52g User Guide

span. But, I understand the Generac Q55-G has a variable speed arrangement based on load but still puts out 60 cps.

Generac NP66G Issues Prior to doing that I started it up, let it warm a little for a few minutes and flicked the CB's on to check the voltage, sure enough it was still putting out 150V at 60 cycles, shut er down and exchanged parts

## **Generac NP66G Issues - iRV2 Forums**

About Generac Generators . When the lights in your home start to flicker and thunder begins rolling outside, having an external source of power makes life more comfortable. With a 20 KW Generac generator, power outage problems become a thing of the past.
